A Fine Quality.—We have already mentioned the purchase by Messrs. Angust Coleman & Co., of this city (who did the stone work for the new Court House), of a fine quarry within four miles of Bowling Green and two and a half miles of the Memphis Brunch road. The stone of this quarry is of the finest quality, and susceptible of being worked by chisel and saw into any and every form required for house-bnilding, flag-stones, tomb-stones, etc. Blocks of immense size, sufficient for the longest and heaviest pillars, and slabs of any breadth, can be had in unlimited adminlance, without flaw, sand holes, or other imperfections. Artisans who have had extensive experience in working the limestone of the best quarries in other sections of the West give this preference over them all. It being of miform consistency without hard points, flaws, relating the blood and obviating costiveness. form consistency without hard points, flaws, riching the blood and obviating costiveness. nr sand holes, can be most economically worked. PRESERVING FRUITS.—Dr. Thacher V. Bush, of Gallalin, Tennessee, has patented a method of that whose memory now lingers by him. It is in contemplation to build a railroad to connect this valuable quarry with the Memphis railroad, the length of which will be some 2½ miles, and the length of which will be some 2½ miles, and find them as sweet and solid as if just taken from the ground.
